Subject index

Acrosome reaction
  evaluation using antibodies and triple stain 431
  induction by exposure to low temperature 423
Androgens
  hamster, simulation of deprivation by inhibition of 5-α-reductase 359
  mouse, production in cryptorchidism 66
Antisperm-antibodies, detection in patients with primary testicular cancer 179
Asthenozoospermia
  caused by flagellar anomaly 108
  human, motility after treatment with ionophore 167
Autoimmune orchitis, testicular lesion and lymphocyte subpopulations in rats 468
Azoospermia
  induced by an androgen-progestin combination 248
  obstructive 1

Capacitation, effect of piperine on hamster sperm 283
Carcinoma-in-situ, in cultured seminiferous tubules 33
Coagulum, prolactin and glucosidase activity in normal and poor coagulation 159
Computerized motion analysis
  fertile donors and asthenozoospermic patients 167
  movement characteristics and hyperactivation of human sperm 412
  motility characteristics compared with photomicrography 149
  serum-induced stimulation of motility 11
Contraception, male, induced by an androgen-progestin combination 248
Cryopreservation, chromatin alterations influence the fertilizing ability 328
Cryptorchidism, mouse, androgen production 66
Cystic fibrosis, fertility of male patients 437

Ejaculation
  disturbances of the sequence 386
  seminal emission by electrical stimulation in dogs 461
  sequence in men with low sperm chromatin-zinc 174
Epididymis
  mouse, action of androgens on esterases 209
  rat, non-specific uptake of IgG 364
Epididymo-vasostomy 1

Fertility, in male survivers of childhood leukaemia 312
  of male cystic fibrosis patients 437
Flagellar anomaly, detection in routine semen analysis 108

Hamster egg test
  effect of A23187 concentration and exposure time 127
  increase of fusion by induction of acrosome reaction 432
Harderian glands, hamster, porphyrin metabolism 359
Hypo-osmotic swelling, a simple 'water-test' 278

Immunosuppression
  human, immunosuppressive substances in the ejaculate 243
  mouse, effect of a testicular extract 291
  mouse, effect of water-insoluble fraction of seminal vesicle fluid 196
Infection
  automated test for leukocytospermia 271
  sperm bacteria ratio impair sperm motility 264
Infertility
  antisperm-antibodies and testicular cancer 179
  DFP-binding proteins in seminal plasma 186
  due to asthenozoospermia and flagellar anomaly 108
  a method to assess sperm-membrane integrity 278
  treatment of retrograde ejaculation 87
In-vitro fertilization
  influence of sperm count and motility 79
  involvement of sperm angiotensin converting enzyme 333
  hamster, effect of piperine 283

LHRH
  effect of an analogue on spermatogenesis in the dog 441
  human, significance of pulsatile secretion 23
Leucocytospermia
  an automated test for diagnosis 271
Leukaemia, male, fertility after childhood lymphoblastic 312
Leydig cells
  mouse, effect of cryptorchidism on androgen production 66
  mouse, steroidogenesis in sex-reversed animals 140

Microcirculation
rat, after unilateral orchidectomy 453
rat, arginine-vasopressin induced changes 58

Oligozoospermia, lactate dihydrogenase activity in sperm 257

Pampiniform plexus, countercurrent transfer of heat with testicular artery 232
Prolactin, in normal and poorly coagulated human semen 159
Prostatic cancer, treatment by GnRH agonist with an antiandrogen or bromocriptine 376

Retrograde ejaculation, treatment by instillation of medium into the bladder 87

Semen
human, prolactin and glucosidase activity in normal and poor coagulation 159
human, quality variation in normal men 99
Semen analysis
detection of flagellar anomaly 108
variability in normal men 99
Seminal plasma
human, DFP-binding proteins 186
human, immunosuppressive activity 243
human effect on sperm motility 44
human, origin of motility inhibitor 91
human, prolactin and glucosidase activity 159
rodent, seminal vesicle proteins 52
Seminal vesicle
human, origin of motility inhibitor 91
mouse, biological functions of water-insoluble fraction 196
rodent, electrophoretic pattern of proteins 52
Seminiferous epithelium, production of interleukin and spermatogonial DNA-synthesis 223
Sertoli-cell-only syndrome, morphological evidence for two types 117
Sex-reversed mice, testicular steroidogenesis 140
Sperm
hamster, effect of piperine on capacitation 283
human, angiotensin converting enzyme 333
human, assessment of membrane integrity 278
human, chromatin alterations induced by freeze-thawing 328
human, count and motility influence the results of IVF 79
human, effect of contact with bacteria on motility 264
human, effect of pentoxifylline on superoxide production 320
human, lactate dihydrogenase activity 257
human, low chromatin-zinc 174
human, outcome of the hamster egg test 127
human, perils of release 307
human, transport in the female reproductive tract 394
human, X- and Y-bearing 340
Sperm motility
human, characteristics by automated system and photomicrography 149
human, computer-assisted measurement 11
human, effect of contact with bacteria 264
human, effect of seminal plasma 44
human, hyperactivation after treatment with ionophore 167
human, hyperactivation on epithelial cell monolayers 412
human, influence on IVF-ET 79
human, origin of seminal plasma inhibitor 91
human, serum-induced stimulation 11
Spermatogenesis
canine, effects of LHRH-analog 441
human, suppression by an androgen-progestin combination 248
Spermatogonia, DNA-synthesis and interleukin production 223
Superoxide, effect of pentoxifylline on production by human sperm 320

Testis
human, carcinoma-in-situ in cultured seminiferous tubules 33
human, idiopathic Sertoli-cell-only syndrome 117
human, measurement of volume 241
human, primary cancer and antisperm-antibodies 179
mouse, effect of cryptorchidism on androgen production 66
mouse, immunosuppressive effect of an extract 291
mouse, steroidogenesis in sex-reversed animals 140
rat, arginine-vasopressin and blood flow 58
rat, interleukin and spermatogonial DNA-synthesis 223

Varicocele, an inappropriate model in the dog 348
Vas deferens, mouse, action of androgens on esterases 209
